

Coming to FMF 2018?

We are pleased to invite you to attend our session for CFPC members involved in developing continuing professional development activities.

W160 You've been invited to join a scientific planning committee:

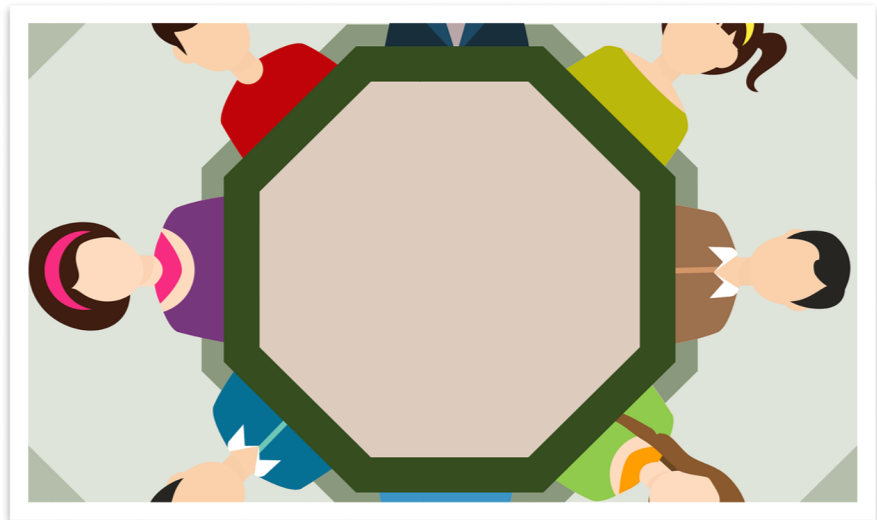

Now what?

Wednesday, November 14, 2018, 11:15 am to 12:15 pm

Learning Objectives:

After active participation in this session participants will be able to:

1. Describe the role of scientific planning committee members in the planning, development, delivery and evaluation of Mainpro+® certified CPD activities
2. Determine and apply the best methods for assessing perceived and unperceived learning needs of the intended target audience
3. Describe strategies to manage conflicts of interest and mitigate potential bias in the development and delivery of Mainpro+ certified CPD

When planning continuing professional development (CPD) activities the importance of having an effective Scientific Planning Committee is paramount. With the recent changes the CFPC has made in establishing firm quality criteria for programs seeking Mainpro+ certification, the need for planning committees with superb skill and knowledge capacities is essential to a highly functional CPD system. The goal of this case-based, interactive session is to share best practices for how planning committees undertake tasks such as performing a proper needs assessment, writing clear learning objectives, all in keeping with the ethical principles of CPD program development and delivery.

Presenters

Dr. Jamie Meuser

Dr. Christie Newton

Dr. Rick Ward
